

North Austin Animal Hospital
AUTHORIZATION FOR HOSPITALIZATION, SURGERY, OR ANESTHESIA

Owner:

Pet:

Date:

I authorize North Austin Animal Hospital to perform any procedures necessary for treating and maintaining my pet's health and well being. While I expect all procedures to be performed to the best of the staff's abilities, I realize the hospital makes no guarantee or warranty regarding the results. I understand there is a risk to many procedures, including anesthesia. If my pet should injure itself, escape, fail to eat, become ill, or die, I do not hold North Austin Animal Hospital and its employees responsible. I agree to pay in full when my pet is discharged. I give my consent to North Austin Animal Hospital to perform the following procedures. I may request an estimate for these procedures at any time.

In the instance of dental cleaning, I agree to any teeth extractions that the doctor deems necessary for my pet's health.

I do not agree to any teeth extractions or additional diagnostics that the doctor deems necessary for my pet's health. *In the event we cannot reach you we will have to perform necessary procedures to keep your pet under anesthesia for minimal time necessary.

Treatment notes:

Preanesthetic testing and treatment release

Like you, our greatest concern is the well being of your pet. We are committed to the safest anesthesia for all our patients. Problems can arise because of pre-existing liver, kidney or blood conditions that may not be detected during physicals. For this reason, we recommend several preanesthetic tests to help provide reasonable assurance of the lowest possible risk for your pet. The information also serves as a baseline that we can refer to in years to come. For the safety of our senior pets, preanesthetic testing is required within 1 month of anesthesia for all patients 7 years of age and older.

Includes: Complete Profile (Required for 7 years and over and Ill Patients)
Complete Blood Count, full test serum chemistry health profile, SDMA
and Electrolytes (blood salts)

Yes, I approve of the pre-anesthetic testing.

NO, I have elected to decline the recommended tests.

Microchip Identification is a means of lifelong identification should your pet be lost. A small device the size of a rice grain is placed under the skin. This can be done while your pet is anesthetized. (\$62.00 includes registration fee)

Yes, I approve of Microchipping my pet.

No, I decline Microchipping.

We now offer Therapeutic Laser treatment post surgically. This helps decrease inflammation, pain and swelling. The cost for this treatment post operatively is \$33.00. Would you like for us to perform this on your pet? Y / N
